

49922 to 49954—Continued.

49923. ANEMONE VITIFOLIA Buch.-Ham. Ranunculaceæ.

An ornamental plant, 1½ to 3 feet high, with white flowers. Common in Nepal.

For previous introduction, see S. P. I. No. 47693.

49924. BERBERIS ANGULOSA Wall. Berberidaceæ.**Barberry.**

A deciduous shrub from India, 4 feet or more high, with dark glossy green leaves, orange-yellow flowers, two-thirds of an inch across, and scarlet fruits.

49925. BERBERIS BEANIANA C. Schneid. Berberidaceæ.**Barberry.**

A shrub with vigorous shoots, yellow spines, small yellow flowers, and purple plum-shaped fruits. (Adapted from *Sargent, Plantæ Wilsonianæ*, vol. 3, p. 439.)

49926. BERBERIS CONCINNA Hook. f. Berberidaceæ.**Barberry.**

A low bush of compact habit with lustrous green leaves white beneath, deep-yellow flowers, and red berries. Native to the Sikkim Himalayas.

For previous introduction, see S. P. I. No. 40145.

49927. BERBERIS DUBIA C. Schneid. Berberidaceæ.**Barberry.**

A Chinese shrub with ovate leaves paler beneath and with flowers in short racemes. (Adapted from *Bulletin de l'Herbier Boissier*, second series, vol. 5, p. 663.)

49928. BERBERIS LYCIUM Royle. Berberidaceæ.**Barberry.**

A Himalayan plant that yields the Indian "rasout," an extract from the root used to allay inflammation of the eyes; also employed by the natives in the treatment of fevers of all kinds. The beautiful purple fruit is covered with a delicate bloom, is edible, and is dried and exported. (Adapted from *Curtis's Botanical Magazine*, pl. 7075.)

For previous introduction, see S. P. I. No. 30769.

49929. BERBERIS AGGREGATA PRATTII C. Schneid. Berberidaceæ. **Barberry.**

A western Chinese shrub, 6 to 10 feet high, with yellow flowers in narrow panicles and ovoid salmon-red fruits.

For previous introduction, see S. P. I. No. 44527.

49930. BERBERIS SOULIEANA C. Schneid. Berberidaceæ.**Barberry.**

A plant with very firm leaves having rather spreading spinose teeth and distinctly glaucous globose fruits. (Adapted from *Sargent, Plantæ Wilsonianæ*, vol. 3, p. 437.)

For previous introduction, see S. P. I. No. 40682.

49931. BERBERIS THIBETICA C. Schneid. Berberidaceæ.**Barberry.**

A red-fruited bush, 1½ to 2 meters high, found in thickets at an altitude of 3,200 to 3,400 meters in western Szechwan.

49932. BERBERIS UMBELLATA Wall. Berberidaceæ.**Barberry.**

An erect straggling Himalayan shrub, 8 to 10 feet high, with oblong berries.

For previous introduction, see S. P. I. No. 33023.

49933. BERBERIS HOOKERI Lem. Berberidaceæ.**Barberry.**

(*B. wallichiana* Hook., not DC.)

A yellow-flowered shrub, native to forests at altitudes of 8,000 to 10,000 feet in the temperate portions of the Himalayas. It has evergreen lanceolate leaves and blackish purple, shining berries. (Adapted from *Hooker, Flora of British India*, vol. 1, p. 110.)

For previous introduction, see S. P. I. No. 44381.
